Subject: State Highway 27 and 27th Street "G" Canal Project

Dear Mr. Barrus,

This letter is written to support the Idaho Transportation Department (ITD) State Highway 27 and 27th Street "G" Canal Project that is currently in the final design stages. We have been working closely with ITD design engineers for a number of years to coordinate the work surrounding the "G" canal structure replacement. Much care has been taken to ensure that coordination of surrounding public utilities replacement, including the City of Burley utilities, is addressed. In addition, widened roadways to address increasing traffic counts in that area will be enabled by the contemplated design and is a much needed improvement.

The ITD project team has done an excellent job of reaching out to local government agencies and utility providers to ensure that the project meets the needs of each stakeholder. We have met as often as weekly as different stages of project planning have taken place. The City of Burley looks forward to completion of this project, fully supports ITD's efforts in finalizing project planning, and appreciates the partnership with ITD in making this project a success for our community.

Sincerely,

A handwritten signature in black ink, appearing to read "Bryan Reiter", is written over a horizontal line.

Bryan Reiter
City Engineer
